

Ultimate Forex Trading

# RULE BOOK

# Hello Traders!

**S**uccess is not a fantasy. It's far from it actually. Success in your trading is all about finding the perfect formula...

For the past 20 years, I've been working alongside thousands of traders in an attempt to help them exceed their trading goals and there are a few lessons and "trading rules" that I've learned along the way. As you continue to strive for Forex success, consider these tried and true rules for more consistent Forex returns.

*John - FXCMIEF*

**Relying solely on trading systems is a slow death. Use systems as your guide, but don't outsmart your common sense.**

**01**

# 02

**If finding or placing a trade is difficult, chances are you're doing it wrong.**

# 03

**If the market does not take out the A, it has no choice but to go your way.**

# 04

**Avoid damage to your trading account due to pullbacks by locking in profits early with protective stop losses.**

# 05

**Plot your ABCDs before you plot your Fibonacci, but use both tools to identify future reversal points.**

# 06

**Check your fixed target each and every morning to identify future direction.**

# 07

**The important part is not questioning the target, it's timing your market entry based upon that target.**

08

**Don't neglect the exotic  
currency pairs.**

09

**The biggest rule  
to creating passive  
income is properly  
using system  
based trading.**

# 10

**Don't lose a second of shuteye. Utilize automated trading systems to find trades while you sleep.**

**Take the Swiss army knife approach to your technical analysis, but make sure you know how to use this approach safely.**

# 12

**Monitor the smaller news stories that come out of the U.S. that could have the biggest impact on the market and your trades.**

# 13

**If your primary USD pairs are moving in varying directions, be advised of the danger zone and stay out of the market.**

14

**Don't forget to size into  
your basket trading  
with MTI's basket  
trading formula.**

**Take the CEO  
approach to trading by  
delegating the work  
but retaining the right  
to have the final say.  
Do this to amplify your  
trading system.**

15

# 16

**Trade with the full month in mind, even if you plan to take profit quickly (within the next 5 trading days).**

# 17

**There's money to be made when trading by the day, but be sure to monitor the market waves.**

# 18

**The trend is your friend  
until it bends.**

**If you give into the  
myths, you could  
be giving away your  
profits. Learn the  
facts from the fiction  
surrounding the market  
and your trades.**

# 19

Bonus  
**RULES**

**Always calculate the danger zone BEFORE the announcement is released. Stay out if the market enters into the danger zone during the moments after the announcement's release.**

**20**

# 21

**Set monthly calendar reminders to monitor MTI's top 3 Major U.S. Fundamental Announcements to potentially profit from pops of market volume.**

**Use the windowpane tool (a trader's best kept secret) to dominate during the fast pace of a fundamental announcement's release.**

# 22

# Get Empowered to Trade the Forex Market

Trading foreign exchange on margin carries a high level of risk, and may not be suitable for everyone. Past performance is not indicative of future results. The high degree of leverage can work against you as well as for you. Before getting involved in foreign exchange you should carefully consider your personal venture objectives, level of experience, and risk appetite. The possibility exists that you could sustain a loss of some or all of your initial deposit and therefore you should not place funds that you cannot afford to lose. You should be aware of all the risks associated with foreign exchange trading, and seek advice from an independent financial advisor if you have any doubts. The information contained in this web page does not constitute financial advice or a solicitation to buy or sell any Forex contract or securities of any type. MTI will not accept liability for any loss or damage, including without limitation any loss of profit, which may arise directly or indirectly from use of or reliance on such information.
